Ashland Soil & Water Conservation District is excited to offer one complimentary manure sample analysis per calendar year to producers who demonstrate up-to-date manure application record keeping practices. To receive your complimentary analysis, follow these steps:

- Contact Ashland SWCD Technician & Jerome Fork Watershed Coordinator Erica White to review proper sample collection techniques & let her know when to expect your sample submission.
- Collect your sample. Dry samples can be submitted in a gallon-sized freezer bag; liquid samples must be collected in a special container provided by Ashland SWCD.

- Complete the paperwork on the reverse side of this application.
- Bring a copy of your up-to-date manure application records with you when you drop off your sample. Staff will visually verify the records but will not keep a copy of those records in our office; they stay with you. Be sure to visit www.ashlandswcd.com under manure testing to learn more about using OnMrk digital record-keeping app. It's free, simple to use and automatically records required weather data. Or, ask about Ashland SWCD's free manure record keeping calendar.
- Ashland SWCD will submit your results for analysis; once the analysis is complete, Erica will review your results with you to help you develop a voluntary nutrient management plan.
